

wooden toys

about
Bajó®

history & idea

Bajó has been present for 30 years. It was established in a tiny village of Kamionna, at the foot of the mountain bearing the same name. We started the company at the break of 90's, in time of historical change of political system. Back then, the free market in Poland was virtually non-existent. We created toys for consumers yet to be. Interest in our products was growing along Bajó's development.

The situation in which we began our work forever determined how we run the company. We seek inspiration in tension between conservative world of childhood and wood and contemporary pace of life, technology advancements, virtual reality, overconsumption and flood of information, ecological issues and intensity of social change.

What we offer to parents, grandparents and most of all to children is becoming a master of fun and game. The real fun is based on creating new ways of

communication, prescinding, using symbols, infinite possibility of new worlds. Every child who is having fun is an artist. There is an immense potential hidden in the act of playing and it pays off later throughout life. We intend to serve the art of playing. This is why we create toys.

ecology

We use renewable, easy to recycle material, which is wood of deciduous trees. It comes from places with sustainable forestry. We also source valuable detritus from furniture and parquet manufacturers. Furthermore, we apply cardboard, wool felt and cotton.

around the factory, birds build nests inside our facility. We basically eliminated plastic in the packaging and transport stages.

Wooden toys communicate core ecological ideas. Contact with wood, its friendly warmth, possibility to build a whole universe from simple elements and a message that it carries - we believe these are crucial steps in forming environmental consciousness. One may say that wooden toys convey the love for nature in a perfect way.

However, material doesn't quite define our approach to ecology related problems. The starting point here is design and production process. The main objective is to make solid, lasting things. We know for a fact that the second generation plays with the same Bajó toys. We replace missing pieces, fix our toys and keep in touch with our costumers. Timeless design gives new life to Bajó toys and sometimes they become home decorative elements, childhood memorabilia. In the production process we have increased the renewable energy sources. Factory roof is covered with solar panels. Good proof of coexistence with surrounding nature is the fact that deer raise little ones in the woods

solidarity

Bajo emerged shortly after great social victory of Solidarity movement. The victory instantly became giant, systemic transition challenge. In our small village, as elsewhere in Poland, there was a lack of capital, tools, technology and experience to handle the new economic order. Idea of Solidarity gave us the concept to start production of wooden items made by elderly and disabled individuals, in such a way that did not require specialized skills. There was abundance of wood from old orchards, which were cut down in bulk. Finally, we, the founders, added in our professional skills. We are master designers and academic teachers at Cracow's Polytechnic, department of architecture. And this is how designing, producing and selling toys began.

Nowadays, our company employs also people who find it difficult to compete for work. Our pedagogical proficiency allows us to educate youth from surrounding villages and vocational schools as well as Academy of Fine Arts students. We have taken part in numerous local and European educational, prosocial programs. We are partners with therapeutic and juvenile centers. The toys we make carry notion of solidarity in themselves. In the design process we always focus on the possibilities of reaching out to new

people. The ultimate goal is to provide education and blissful childhood through the toys we create. They have the power to inspire actions that lead to climate crisis prevention, better understanding and acceptance of social diversity.

In 2013 BAJO launched a new design collective, and called it "TOBE". This project brings to market creatively designed toys from multiple designers.

At about the same time BAJO designed and produced under license a toy collection based on the award-winning children's book written by Julia Donaldson and illustrated by Axel Scheffler : **The Gruffalo.**

materials

We use carefully selected high quality materials from certified local suppliers, who respect European eco-standards of wood production.

colours

We use only certified non-toxic paints based on natural components, which fulfil EU safety standard (EN71) and US norms. We use wide range of water based paints as well as oil to protect the wood.

quality

Our toys correspond to all EU and US standards and requirements for toys safety (Directive 2009/48/EC and REACH regulations) in terms of materials, manufacture and labelling. We support our community by using only carefully selected high quality materials from certified local suppliers, who respect European eco-standards of the wood production. Each product is hand-checked to ensure quality of the completed item.

All of our products are manufactured in Poland.

packaging

We are doing our best to eliminate all the plastic from our packaging. That's why we screen print majority of our packaging and use paper tape to close the boxes. Our box fillers are made of leftover cardboard. We still look for new, better solutions to be planet friendly.

infant toys

Rattles, chewing toys, simple shapes, raw material, touch, colour, sound, movement. These initial toys have double role to play. They link toddler with the world. Thus beginning fascinating contact with reality and amazing realization of one's existence. Simultaneously, first games such as touching, pushing, chewing are wonderful form of communication with observant parents. It is a special kind of closeness. We take great care of manufacturing the toys and apply the same emphasis to quality to guarantee safety. This has been confirmed with European Regulations by TUV Rheinland and SGS.

The spheres in the ladybird allow it to roll on any surface.

infant toys

classic

Children form the primary human community. They still prefer riding horses, steam locomotives and building feudal castles. In every generation childhood repeats the immemorial cycle using the same toy kit. Classic toys deserve their noble name. They are classic for at least two reasons: 1) they possess everlasting patterns 2) their form has been perpetually perfected. As such they are one of a kind.

1+

37840

Sortroller

natural

22 x 16 x 18 cm

37830

green & blue

The Sortroller consist of two parts: the body of the snail (the wheeled base) and its shell (the cylinder). Pull the Snail's body and watch its shell roll. Take the shell off and use it as a sorter. It has 6 different holes to shove the wooden shapes through. This helps the child distinguish between shapes and enhances their dexterity. You might even find the little ones using it as a rattle while shaking the shell full of colourful shapes.

classic

When the wheels of this push-along toy turn, the petals of the flower rise and spin. The flower opens and floats creating a rainbow.

18

role playing

Acting like mom or dad it's the oldest game in the world. Children have always been fond of dolls, building houses, working in carpentry, workshops, transporting various goods, teaching at school and galloping on horseback. We have developed these ideas to be with them in their adventures when they picture themselves being grown ups in the future.

These cute animals come to life in your hands. All the textiles used are cotton knitwear and they respond to the European Safety Standards. They are sewn with care and love in Poland.

role playing

animals

The animal kingdom is wild and diverse. For us it doesn't only include the ones near us like farm animals and pets, but also exotic beasts and dinosaurs, the ancient inhabitants of our planet. It also contains mythological creatures and fantastic animals.

Animals are inevitably present in childhood and kids create a symbolic connection with them. Wolves and hares, bears and foxes, donkeys and monkeys, become some of the main characters in children's imagination, after all animals and kids share the world of childhood. The babies of animals have the same need to play as human children.

Teddy bear, bird rattle, dachshund and Miga the Dog; these are the some of the toys that we created to represent this kingdom.

vehicles

There is wide variety of toys which introduce topics of street traffic, speed and mobility to the world of play. Stylised, colourful and diverse, these cars are not intended to merely imitate cars from the world of adults, they refer rather to the child's imagination and develop spatial orientation, the sense of direction and distance.

The collection of colorful large and small vehicles, includes:

- Trucks which can be loaded and unloaded.
- Emergency vehicles: ambulance, police, fire brigade and road inspection.
- Passenger vehicles: buses, cars of various types.
- Aircrafts and helicopters, which travel along with the child.

Be wowed by the movement of this train. When the wheels go round the train comes to life. Pull it forward and watch the trains engine move independently from its driver cabin. At the same time its cargo turns around making the bell inside jingle.

2+

45310
Train to build
53 x 9 x 8 cm

This train set consist of many interchangeable elements, each different in colour and shape. Children can create their own unique combinations by stacking cargo pieces on wheeled trailers in many ways. Play develops imagination and creativity.

education

BAJO's toys develop together with every child. The educational element starts with a basic principle but as the child's abilities grow so does the potential of BAJO toys.

These educational wooden toys are built upon the ideas of learning while playing:

- Experiencing shapes, proportions and colours by recognising, classifying and associating.
- Developing manual skills, self-reliance, concentration and resourcefulness.
- Discovering the relationships between shapes, colour, size and patterns.

1+

34610
Balance
37 x 8 x 15 cm

This toy was awarded 'Best Design Award' by
The International Toy Fair in Nuremberg.

In this ingenious toy the abacus meets the stacking board. Ten rows of colourful rings ordered from the lowest to highest make easier teaching how to count, while also allowing kids to explore the potential of the classic stacking board, in which the toddler has to put the pieces on bolts. Blockades at the end of the ropes prevent rings from going astray.

3+

38210
Rope abacus
43 x 8 x 13 cm

2+

32710
Stacker 1-5
36 x 11 x 19 cm

This is a multifunctional educational toy. Its primary function is to introduce children to the concept counting. The rods are associated with the number below them, making learning easier. You can demonstrate elementary mathematical operations by adding and subtracting the colourful rings. Wheels on the sides add to the stacker an element of additional fun.

puzzles & blocs

In it's most basic sense, puzzles are matching pieces. You have to connect them so that they reflect the bigger picture. Blocks, on the other hand, are fragments that form models with different degrees of complexity. Blocks can become puzzles when you come up with your own structure and each piece has its own place. In the end the pieces of a puzzle can be use like blocks too. Don't forget, the only rule is to do as you please.

games

To play the game you have to follow the rules, they can be simple or also complex. You can come up with rules or you can move the figurines in a toy theatre playing roles in any story. You may kick-start whirligigs or marble run, where laws of physics are the rules. Games utilize motoric skills - bowling, perceptivity - memory, strategy power - domino. Painting, literature, film, theatre, satire, opera, the whole world of art is game reality, only having more complex and mysterious principles.

Why is Bajo® ecological?

*Some reasons why
wooden toys
are a sustainable
source of fun!*

1 Wood is a renewable resource

Unlike plastic, wood biodegradates quickly and doesn't contaminate the environment. Trees grow back while plastic is just litter.

2 We use leftovers

Many Bajo toys are made from the smaller pieces that are left after some furniture factories had taken the big wooden pieces they need.

3 The wood in Bajo toys is environmentally responsible

All our wood comes from companies respect EU Timber Regulation, so we can be sure that is a sustainable plantation without destroying any forest or ecosystem.

4 Basically plastic free

We are committed in the reduction of plastic usage. Our boxes are made of cardboard and we try to use paper-based resources to secure the shipments. Our toy-making process has very little carbon footprint.

5 Almost nothing is wasted

The leftovers of our production are used for small toys and games, the pieces that can't be used become a wood-derived resource for other uses.

6 Wooden toys are natural

Wooden toys are a direct connection to the natural world for children, they improve mental and physical wellbeing.

7 Bajo is socially responsible

Every single toy is handcrafted in our modest factory in Poland, making a positive impact in our community. We care about our employees and we pay them fairly.

8 Our toys are durable

We make beautiful, timeless, authentic and durable toys that can pass from a generation to another in perfect condition.

9 We educate in ecology.

Many of our toys are designed to raise awareness on today's world challenges, and green conscience so children can become planet-friendly adults.

ON THE COVER:

Amazon rainforest is one of the most important ecosystems on the planet but sadly it's in danger, together with all the life thriving in it. We can all protect it but the first step is to inform ourselves. Amazon, the lungs and heart of our planet needs us.
